#### **About the Organizer**

BPCA is situated in the heart of mega cosmopolitan Mumbai city, which is the state capital of Maharashtra. The college which has been established by the Bombay Physical Culture Association (popularly known as BPCA) in 1978, it conducts various programmes in Physical Education & Sports viz. B.P.Ed, M.P.Ed & Ph. D as well as Certificate Courses in Fitness, Yoga & various games & sports. The College has been awarded BEST COLLEGE AWARD by the University of Mumbai for its Academic excellence. Ours is the only college in the state which has faced 4 cycles of assessment and accreditation by NAAC. BPCA CPE invites you to participate in this International Conference on, "Physical Education, Sports Sciences, Yoga & Recreation for Global Wellbeing."

## About Conference

Well-being can improve the health of those around us. It's true that happiness has positive effects on your health and longevity. Studies have found that happier people tend to have stronger immunity, maintain their weight better, and sleep better.

Global Wellbeing is significant because it bridges the gap between physical health and mental health. This means that it focuses on not only the physical aspects of health, but the health of the mind as well, and reaffirms that one cannot exist without the other.

> This approach to wellness focuses on finding a long-term lifestyle, which promotes not only happiness, but physical well-being. Without the balance between mental and physical states there is no way the body can run at its full potential.

## **About Theme**

*"Physical Education, Sports Sciences, Yoga & Recreation for Global Wellbeing"* 

- The purpose of physical education is to learn or develop a positive relationship with physical activity, physical fitness, and health.
- Sports Sciences aims to improve performance and endurance in preparation for events and contests while reducing the risk of injury.
- Yoga emphasizes deep and relaxed breathing which prevents respiratory ailments and ensures that your breathing is always working at its optimal level.

- Yoga promotes healthy aging as it improves balance, body awareness and concentration, thus reducing the risk of falls and fractures that can come with old age.
- Yoga stimulates the nervous system and helps to expand the chest cavity, which strengthens your lungs and allows the lungs space to function fully.
- Physical Education, Yoga & Recreation boosts our body's production and helps our brains relax and stimulates us cognitively, which results in greater productivity at work. Our brains also release more serotonin, a happiness hormone, which improves our moods, relieves stress, and makes us better colleagues, friends, and family members.
